msMicroImager

Data analysis software for ultra-high mass-resolution MALDI MS imaging

JMS-S3000 SpiralTOF is an ultra-high mass-resolution MALDI-TOFMS with unique SpiralTOF ion optics.

msMicroImager makes full use of the detailed information from ultra-high mass-resolution MS imaging.
For ultra-high mass-resolution MS imaging!

- Handles data larger than 10 GB*
- Extracts and analyzes more than 100 MS images at once*
- Works with msTornado Analysis for mass spectral data analysis

msMicroImager Extract
Extracts MS images
Extracts mass spectra of the regions of interest (ROIs)

msMicroImager View
Browse MS images
Compare and perform arithmetic operations between MS images

msTornado Analysis
Analyzes mass spectra extracted by msMicroImager Extract

* Refer to separate specification sheet for recommended PC specifications.
* Specifications subject to change without prior notice.
